10-port Gigabit Easy Managed PoE Switch

(ONV-H5108PFM)

OVERVIEW

The ONV-H5108PFM is a Gigabit Easy managed PoE fiber switch independently developed by ONV. It has 8*10/100/1000Base-T adaptive RJ45 ports and 2*1000Base-X uplink SFP fiber ports. Port 1-8 can support the IEEE802.3af/at PoE standard, and single-port PoE power is 30W. As a PoE power supply device, it can automatically detect and recognize the power-receiving equipment that meets the standard and supply power through the network cable. It can supply power to PoE terminal equipment such as wireless AP, IP camera, VoIP phone, building visual access control intercom, etc., through the network cable, to meet the network environment that needs a high-density PoE power supply. It suits hotels, campuses, factory dormitories, and small and medium-sized enterprises to form cost-effective networks.

The ONV-H5108PFM can support Web management, ONV-NMS cloud management

platform, and cloud APP management. Supports the ring network protocol RSTP (<50ms) to enhance link redundancy and network reliability, reduce the number of fiber splicing operations and network nodes, and improve construction efficiency. When a unidirectional network fails, communication can be quickly restored to ensure uninterrupted communication of important transmissions. It can manage security network topology, VLAN settings, port management, PoE management, remote operation and maintenance, and other functions. It has high reliability, easy installation and maintenance, fast switching function, and multiple access ports, suitable for access to LAN devices of various sizes.

FEATURE

■ Gigabit access, uplink SFP fiber port

- ◇ Support non-blocking wire-speed forwarding.
- ◇ Support full-duplex based on IEEE802.3x and half-duplex based on Backpressure.
- ◇ Support Gigabit RJ45 port and SFP fiber port combination, which enables users to flexibly build networking to meet the needs of various scenarios.

■ Smart PoE power supply

- ◇ Support remote PoE management, realize remote on/off of PoE ports, port power status check, port fault query, etc.
- ◇ Comply with IEEE802.3af/at PoE standard, automatically identify PoE devices for power supply, and not damage non-PoE devices.
- ◇ 8*10/100/1000Base-T RJ45 ports can support PoE power to meet the needs of security monitoring, teleconferencing system, wireless coverage, and other scenarios.

■ Minimalist application

- ◇ Support real-time fault alarm and fault location.
- ◇ Support remote upgrade, remote restart, and restore factory settings.
- ◇ Cloud platform and mobile APP operation and maintenance management, visual port control, network topology management, VLAN division.

- ◇ Web network management functions include QoS, link aggregation, ring network management, port mirroring, port control, and bandwidth management.
- ◇ Based on the needs of industry applications, the complex network management configuration is abandoned, and practical network management functions are retained. Network deployment and centralized operation and maintenance can be quickly realized through the operation and maintenance platform.

■ Stable and reliable

- ◇ CCC, CE, FCC, RoHS.
- ◇ The user-friendly panel can show the device status through the LED indicator of PWR, SYS, Link, and L/A.
- ◇ Low power consumption, galvanized steel housing, and excellent heat dissipation to ensure the stable operation of the switch.
